

Keith Gremban

Keith Gremban is the former Director of the Institute for Telecommunication Sciences (ITS), the research and engineering laboratory for the National Telecommunications and Information Administration (NTIA). Keith has been involved in systems engineering and advanced technology development for over thirty years. Prior ITS, Keith was a Program Manager at the Defense Advanced Research Projects Agency (DARPA) where he worked in wireless communications and electronic warfare. Prior to DARPA, Keith worked at a variety of companies and research institutes, managing and leading research and systems engineering projects. Keith received his Ph.D. and M.S. in Computer Science from Carnegie Mellon University, and his M.S. in Applied Mathematics and B.S. in Mathematics from Michigan State University.
