

Challenges to global cooperation: whether and how to regulate AI

Cameron F. Kerry

BROOKINGS

The Forum for Cooperation on Artificial Intelligence

The Forum for Cooperation on Artificial Intelligence (FCAI), a collaboration between the Brookings Institution and the Centre for European Policy Studies, hosts regular AI dialogues among high-level officials from seven governments (Australia, Canada, EU, Japan, Singapore, U.K., and the U.S.) as well as experts from industry, civil society, and academia, aimed at identifying opportunities for international cooperation on AI regulation, standards, and research and development. Many of the ideas and policy recommendations from the dialogues are reflected in FCAI reports and blogs.
