IMPORTANT - PLEASE READ

It is very important that you correctly enter the license plate information of the vehicle you will park on campus. CU Boulder uses license plate recognition technology for parking enforcement. Your license plate acts as your permit. Entering incorrect license plate information or generic information such as RENTAL, RENTALCAR, UNKNOWN, NOPLATE, 12345678, or any plate information that does not match the license plate of the vehicle you park on campus means our parking enforcement system will not be able to verify your vehicle's parking permit. Consequently, entering incorrect or generic information may result in a parking ticket. If after purchasing your permit, you need to update your license plate information, you may do so by logging into your account or using the View Permit link in your permit receipt email.
